SECURITY DETAILS

INSURER'S LIABILITY LMA3333

(Re)insurer's liability several not joint

The liability of a (re)insurer under this contract is several and not joint with other (re)insurers party to this contract. A (re)insurer is liable only for the proportion of liability it has underwritten. A (re)insurer is not jointly liable for the proportion of liability underwritten by any other (re)insurer. Nor is a (re)insurer otherwise responsible for any liability of any other (re)insurer that may underwrite this contract. The proportion of liability under this contract underwritten by a (re)insurer (or, in the case of a Lloyd's syndicate, the total of the proportions underwritten by all the members of the syndicate taken together) is shown next to its stamp. This is subject always to the provision concerning 'signing' below. In the case of a Lloyd's syndicate, each member of the syndicate (rather than the syndicate itself) is a (re)insurer. Each member has underwritten a proportion of the total shown for the syndicate (that total itself being the total of the proportions underwritten by all the members of the syndicate taken together). The liability of each member of the syndicate is several and not joint with other members. A member is liable only for that member's proportion. A member is not jointly liable for any other member's proportion. Nor is any member otherwise responsible for any liability of any other (re)insurer that may underwrite under this contract. The business address of each member is Lloyd's, One Lime Street, London, EC3M 7HA. The identity of each member of a Lloyd's syndicate and their respective proportions may be obtained by writing to Market Services, Lloyd's, at the above address.

Proportion of Liability

Unless there is 'signing' (see below) the proportion of liability under this contract underwritten by each (re)insurer (or, in the case of a Lloyd's syndicate, the total of the proportions underwritten by all the members of the syndicate taken together) is shown next to its stamp and is referred to as its 'written line'. Where this contract permits, written lines, or certain written lines, may be adjusted ('signed'). In that case, a schedule is to be appended to this contract to show the definitive proportion of liability under this contract underwritten by each (re)insurer (or, in the case of a Lloyd's syndicate, the total of the proportions underwritten by all the members of the syndicate taken together). A definitive proportion (or, in the case of a Lloyd's syndicate, the total of the proportions underwritten by all the members of a Lloyd's syndicate taken together) is referred to as a 'signed line'. The signed lines shown in the schedule will prevail over the written lines unless a proven error in calculation has occurred. Although reference is made at various points in this clause to 'this contract' in the singular, where the circumstances so require this should be read as a reference to contracts in the plural.

ORDER HEREON 100% OF 100%
BASIS OF WRITTEN LINES

Percentage of whole

SIGNING PROVISIONS

In the event that the written lines hereon exceed 100% of the order, any lines written "to stand" will be allocated in full and all other lines will be signed down in equal proportions so that the aggregate signed lines are equal to 100% of the order without further agreement of any of the insurers.

However:

a) in the event that the placement of the order is not completed by the commencement date of the period of insurance then all lines written by that date will be signed in full;

b) the signed lines resulting from the application of the above provisions can be varied, before or after the commencement date of the period of insurance, by the documented agreement of the insured and all insurers whose lines are to be varied. The variation to the contracts will take effect only when all such insurers have agreed, with the resulting variation in signed lines commencing from the date set out in that agreement.
1. OPERATIVE CLAUSE

The Underwriters will indemnify the Insured against their liability to pay damages (including claimants' costs, fees and expenses) in accordance with the law of any country but not in respect of any judgement, award, payment or settlement made within countries which operate under the laws of the United States of America or Canada (or to any order made anywhere in the world to enforce such judgement, award, payment or settlement either in whole or in part) unless the Insured has requested that there shall be no such limitation and has accepted the terms offered by Underwriters in granting such cover, which offer and acceptance must be signified by specific endorsement to this Policy.

This indemnity applies only to such liability as defined by each insured Section of this Policy arising out of the Business specified in the Schedule, subject always to the terms, Conditions and Exclusions of such Section and of the Policy as a whole.

For the purpose of determining the indemnity granted

1.1. "Injury" means death, bodily injury, illness or disease of or to any person;

1.2. "Damage" means loss of possession or control of or actual damage to tangible property;

1.3. "Pollution" means pollution or contamination of the atmosphere or of any water, land or other tangible property;

1.4. "Product" means any property after it has left the custody or control of the Insured which has been designed, specified, formulated, manufactured, constructed, installed, sold, supplied, distributed, treated, serviced, altered or repaired by or on behalf of the Insured, but shall not include food or drink supplied by or on behalf of the Insured primarily to the Insured's employees as a staff benefit.

5. "Terrorism" means an act, including but not limited to the use of force or violence and/or threat thereof, of any person or group(s) of persons, whether acting alone or on behalf of or in connection with any organisation(s) or government(s), committed for political, religious, ideological or similar purposes including the intention to influence any government and/or to put the public, or any section of the public, in fear.

6. "Occurrence" means an event, including continuous or repeated exposures to substantially the same general conditions, which result in Injury and/or Damage neither expected nor intended from the standpoint of the Insured. All events of a series consequent upon or attributable to one source or original cause shall be deemed one Occurrence.
2. INDEMNITY TO OTHERS

The indemnity granted extends to

2.1 at the request of the Insured, any party who enters into an agreement with the Insured for any purpose of the Business, but only to the extent required by such agreement to grant such indemnity and subjects always to Clauses 7.3.3, and 12.3;

2.2 officials of the Insured in their business capacity for their liability arising out of the performance of the Business and/or in their private capacity arising out of their temporary engagement of the Insured’s employees;

2.3 at the request of the Insured any person or firm for their liability arising out of the performance of a contract to provide labour only services to the Insured;

2.4 the officers, committee and members of the Insured’s canteen, social, sports, medical, fire fighting and welfare organisations in their respective capacity as such;

2.5 the personal representatives of the estate of any person indemnified by reason of this Clause 2 in respect of liability incurred by such persons;

3. CROSS LIABILITIES

Each person or party specified as the Insured in the Schedule is separately indemnified in respect of claims made against any of them by any other, subject to Underwriters’ total liability not exceeding the stated Indemnity Limits.

4. DEFENCE COSTS

The Underwriters will pay all costs, fees and expenses incurred by the Insured with the Underwriters prior written consent in the investigation defence or settlement of any claim made against the Insured under this Policy (hereinafter called “Defence Costs”) other than in respect of any actions in the United States of America or Canada.

Defence Costs extend to include the costs of representation at any inquest inquiry or other proceedings in respect of matters which have a direct relevance to any claim made or which might be made against the Insured provided such claim or claims arise from an Occurrence which is the subject of indemnity by this Policy.

5. INDEMNITY LIMITS

Underwriters’ liability to pay damages (including claimants’ costs, fees and expenses) shall not exceed the sum stated in the Schedule against each Section in respect of any one Occurrence or series of Occurrences arising from one originating cause, but under Section B and Section C the Indemnity Limits represent Underwriters’ total liability in respect of all Occurrences.

Defence Costs will be payable in addition to the Indemnity Limits unless this Policy is endorsed to the contrary.

Should liability arising from the same originating cause form the subject of indemnity by more than one Section of this Policy, each Section shall be subject to its own Indemnity Limit, provided always
that the total amount of Underwriters' liability shall not exceed the greatest Indemnity Limit available under any one of the Sections providing indemnity.

8.2 was not the direct result of the Insured failing to take reasonable precautions to prevent such Pollution.

9. **SECTION B - EXCLUSIONS**

This Section is subject to the Exclusions of Sections A7 and C11, and also does not cover liability for and/or arising out of

12.4 directly or indirectly occasioned by, happening through or in consequence of war, invasion, act of foreign enemy, hostilities (whether war be declared or not), civil war, rebellion, revolution, insurrection or military or usurped power;
12.5 directly or indirectly caused by or contributed to by or arising from

This exclusion also excludes Injury and/or Damage directly or indirectly caused by, resulting from or in connection with any action taken in controlling, preventing, suppressing or in any way relating to any act of Terrorism.

If the Underwriters allege that by reason of this exclusion, any Injury and/or Damage is not covered by this Policy the burden of proving the contrary shall be upon the Insured.

In the event any portion of this exclusion is found to be invalid or unenforceable, the remainder shall remain in full force and effect.

12.7 directly or indirectly caused by or alleged to be caused by or contributed to in whole or in part or arising from the existence of or exposure to asbestos and/or any asbestos containing materials

12.10 for awards or damages of a punitive or exemplary nature whether in the form of fines, penalties, multiplication of compensation awards or damages or aggravated damages or in any other form whatsoever.
13. GENERAL CONDITIONS

(Conditions 13.1 to 13.4 are precedent to Underwriters' liability to provide indemnity under this Policy).

13.1 The Insured shall give written notice to the Underwriters as soon as reasonably practicable of any Occurrence that may give rise to a claim under this Policy and shall give all such additional information as the Underwriters may require. Every claim, writ, summons or process and all documents relating thereto shall be forwarded to the Underwriters immediately they are received by the Insured.

13.2 No admission, offer, promise or payment shall be made or given by or on behalf of the Insured without the prior written consent of the Underwriters who shall be entitled to take over and conduct in the name of the Insured the defence or settlement of any claim or to prosecute in the name of the Insured to their own benefit any claim for indemnity or damages or otherwise and shall have full discretion in the conduct of any proceedings and in the settlement of any claim and the Insured shall give all such information and assistance as the Underwriters may reasonably require.

13.3 The Insured shall give notice as soon as reasonably practicable of any fact or event which materially changes the information supplied to Underwriters at the time when this Policy was effected and Underwriters may amend the terms of this Policy according to the materiality of the change.

13.4 Where the premium is provisionally based on the Insured's estimates, the Insured shall keep accurate records and after expiry of the Period of Insurance declare as soon as possible such details as Underwriters require. The premium shall then be adjusted and any difference paid by or allowed to the Insured as the case may be subject to any minimum premium that may apply.

13.5 The Underwriters may at any time pay to the Insured in connection with any claim or series of claims under this Policy to which an Indemnity Limit applies the amount of such Limit (after deduction of any sums already paid) or any lesser amount for which such claims can be settled and upon such payment being made the Underwriters shall relinquish the conduct and control of and be under no further liability in connection with such claims except for the payment of Defence Costs incurred prior to the date of such payment (unless the Indemnity Limit is stated to be inclusive of Defence Costs).

Provided that if Underwriters exercise the above option and the amount required to dispose of any claim or series of claims exceeds the Indemnity Limit and such excess amount is insured either in whole or in part, with Defence Costs payable in addition to the Indemnity Limit under this Policy then the Underwriters will also contribute their proportion of subsequent Defence Costs incurred with their prior consent.

13.6 Any dispute concerning the interpretation of this Policy and/or Schedule will be determined in accordance with the Law of Guam.

The Insured and Underwriters submit to the exclusive jurisdiction of any court of competent jurisdiction within Guam and agree to comply with all requirements necessary to give such court jurisdiction. All matters arising hereunder shall be determined in accordance with the law and practice of such court.

13.7 Any phrase or word in this Policy will be interpreted in accordance with the law of Guam. The Policy and the Schedule shall be read together as one contract and any word or
expression to which a specific meaning has been attached in any part of this Policy or the Schedule shall bear such specific meaning wherever it may appear.

13.8 The Underwriters may cancel this Policy by giving sixty days' notice in writing of such cancellation to the insured's last known address.

13.9 If any claim under this Policy is in any respect fraudulent all benefit under the Policy shall be forfeited.
CLAIMS CONTROL CLAUSE

The following clause applies to all circumstances that may give rise to a claim under the Original Policy. Adherence by the Reinsured to the conditions set out herein is a condition precedent to Reinsurer's liability

(1) The Reinsured shall inform Reinsurers of any circumstance that may give rise to a claim on the Original Policy. In addition, the Reinsured shall provide Reinsurers with all available supporting information and documentation relating to the circumstance as soon as reasonably practicable but in any event within 14 days of the Reinsured becoming aware of such circumstance.

(2) Reinsurers shall have the right but not the obligation to assume control of the investigation of the circumstance and the defence and/or settlement of any resultant claim. Where Reinsurers assume control, the Reinsured shall act according to Reinsurers' direction.

(3) No settlement shall be made by the Reinsured without prior written approval of Reinsurers.

Subject otherwise to the Terms Conditions Limitations and Exclusions of the Policy

MEMORANDUM OF UNDERSTANDING

Annual Review Clause

Policy Number: 17N1598
Inception Date: 1st May 2017
Expiry Date: 1st May 2020/1st May 2022

In consideration of the granting of this Policy for a period in excess of 12 months, it is agreed by both Underwriters and the Reinsured that on each 12 month Anniversary Date the Underwriters will be required to continue insurance coverage under this Policy for a further period of 12 months at the same premium and subject to the same terms and conditions, except if any of the following factors apply as at that Anniversary Date (in which case the Underwriters are entitled to review the insurance coverage and amend its terms and conditions, including the premium and the deductible or excess, or, at the sole option of the Underwriters, to issue notice of cancellation in accordance with the conditions set out under the Policy):

1. There has been a Material Change in the Risk.

2. There has been an increase of more than 10% in the Insured's estimated turnover for the forthcoming 12 months period in comparison to that given for the preceding 12 months period.

3. There has been a change in law which has the effect of increasing the Underwriters' exposure.

4. The Incurred Claims exceed 50% of the Net Premium in respect of the prior 12 months' period of insurance to which this clause relates.

5. There has been significant adverse development in the historical loss record in any of the prior 5 years whereby Incurred Claims exceed 50% of the Net Premium.

6. There has been a change in legal regulations relating to insurance contracts which oblige the Underwriters to alter any terms or conditions of the Policy, or

7. There has been a change in Underwriters' reinsurance arrangements - having the effect that reinsurance protection is no longer available to the Underwriters on substantially the same terms and conditions as previously.

The term "Material Change in the Risk" shall mean any change relating to or affecting the Insured's business activities which, if disclosed, might influence the Underwriters to either decline to continue the insurance or to stipulate a higher premium including, but not limited to, the following:

(a) Any change in the business activities of the Insured of a partial or additional nature
(b) Any change, either through expansion or contraction, in the territories or countries in which the Insured transacts their business either in terms of domicile, operations therein or exports thereto

(d) Any change in approach to the training of the Insured's employees or a change in the minimum required competencies of such employees
(e) Any change in approach to the risk management procedures adopted by the Insured
(f) In respect of any information previously supplied to Underwriters, any change in that information

The term "Incurred Claims" means the total cost of claims including actual claim payments (including medical, legal and other costs and expenses) and reserves set by the Underwriters on outstanding claims (also including such costs and expenses).
The term "Net Premium" means the premium received by the Underwriters net of tax and any commissions or other deductions.

Nothing in this Clause shall prejudice any rights the Underwriters may have to cancel this policy in accordance with (i) any cancellation condition, or the like, which may be contained in the Policy or (ii) in accordance with any general principle of contract law (including but not limited to misrepresentation).

The terms of this Clause apply only to this Policy and not to any subsequent policy issued in renewal of this policy nor to any Excess Liability Policy which may be issued to operate in excess of this Policy (unless specifically stated to the contrary herein).

3. The Main Assumptions and Principles used to Construct the Procedures and Methodology used to Determine the Credit Rating as required by Paragraph (a)(1)(ii)(C) of Rule 17g-7

Assumptions and Macroeconomic Factors

Based on historical experience and A.M. Best's transition studies, ratings typically move no more than one to two notches when rating action occurs. However, market influences, including macroeconomic conditions, interest rate movements, inflationary levels, volatility of capital markets, pricing levels and regulatory changes, could result in larger scale movement in the ratings.

Economics

A.M. Best factors the economic and financial system conditions of a country into all of its ratings. A.M. Best defines country risk as the risk that country-specific factors could adversely affect an insurer's ability to meet its financial obligations, and separates the risks into three main categories: economic risk, political risk and financial system risk.

Economic risk is the likelihood that fundamental weaknesses in a country's economy will cause adverse developments for an insurer. A.M. Best's assessment of economic risk evaluates the state of the domestic economy, labor market conditions, inflation levels and volatility, as well as prospects for growth and stability. The level of economic risk in a country is determined to be: (1) very low; (2) low; (3) moderate; (4) high or (5) very high.

Political risk is the likelihood that governmental or bureaucratic inefficiencies, societal tensions, an inadequate legal system or international tensions will cause adverse developments for an insurer. Political risk comprises the stability of a government and society; the effectiveness of international diplomatic relationships; the reliability and integrity of the legal system and business infrastructure; the efficiency of the government bureaucracy; and the appropriateness and effectiveness of the government's economic policies. The level of political risk in a country is determined to be: (1) very low; (2) low; (3) moderate; (4) high or (5) very high.

The scores for each category of risk then are aggregated and the country is assigned to one of five Country Risk Tiers with the following broad definitions:

- CRT-1: Predictable and transparent political environment, legal system and business infrastructure; sophisticated financial system regulation with deep capital markets; mature insurance industry framework.

- CRT-2: Predictable and transparent political environment, legal system and business infrastructure; sufficient financial system regulation; mature insurance industry framework.

- CRT-3: Developing political environment, legal system and business infrastructure with developing capital markets; developing insurance regulatory structure.

- CRT-4: Relatively unpredictable and nontransparent political, legal and business environment with underdeveloped capital markets; partially to fully inadequate regulatory structure.
- CRT-5: Unpredictable and opaque political, legal and business environment with limited or nonexistent capital markets; low human development and social instability; nascent insurance industry.

In general, as country risk increases (measured by a higher assigned tier), the distribution of ratings migrates down the rating scale as the level of risk approaches CRT-5. While potential volatility already is contemplated in each Country Risk Tier, unanticipated negative changes to the economic, political and/or financial system conditions could lead to downward pressure on ratings in that country.

11. An Explanation or Measure of the Potential Volatility of the Credit Rating as required by Paragraph (a)(1)(ii)(K) of Rule 17g-7

**Factors - Change Rating:**

Positive rating actions could occur if the company achieves improvement in profitability, in line with higher-rated peers, while maintaining its risk-adjusted capitalization. Potential rating impact: Minor.

Negative rating actions could occur if there is a considerable deterioration in operating performance that materially affects the company’s risk-adjusted capitalization. Potential rating impact: Minor.
NOTE: Only a rating committee can make a rating decision and the above referenced factors would be taken into consideration, along with all available relevant information in determining a rating action. However, the magnitude of a potential change in the rating that could reasonably occur as a result of the impact of the factors listed above are characterized by the following summary chart:

12. The information on the Content of the Information of the Credit Rating as required by Paragraph (a)(1)(ii)(L) of Rule 17g-7

(1) Rating History and Performance
   * Financial Strength / Issuer Credit Rating History

(2) Expected Probability of Default and Expected Loss

The Commission states that it does not expect NSROs to alter the meanings of their credit ratings or rating procedures and methodologies to conform to this disclosure requirement. Rather, the Commission expects NSROs to provide "information" to the extent it is consistent with their procedures and methodologies for determining credit ratings, on the expected probability of default and expected loss in the event of default. According to the Commission, this information could consist of, for example, historical default and loss statistics, respectively, for the class or subclass of the credit rating.

A.M. Best's credit ratings generally are intended to indicate the relative degree of credit risk of an obligor or debt instrument rather than reflect a measure of a specific default probability or loss expectation. A.M. Best is providing the historical default statistics or derivatives of such default statistics to comply with Rule 17g-7(a)(ii)(L)(2). A.M. Best does not produce any loss statistics related to any classes of credit ratings so it has no information about expected loss given default. Furthermore, expected losses given default is not consistent with A.M. Best's procedures and methodologies for determining credit ratings.

* Ratings Data from 1992 to 2015
1. Impairments as a Proxy for Defaults. A.M. Best designates an insurer as a Financially Impaired Company (FIC) as of the first public action taken by an insurance department or regulatory body, whereby the insurer's a) ability to conduct normal insurance operations is adversely affected, b) capital and surplus have been deemed inadequate to meet regulatory requirements, or c) general financial condition has triggered regulatory concern. The actions include supervision, rehabilitation, liquidation, receivership, conservatorship, cease-and-desist orders, suspension, license revocation and certain administrative orders. Companies that enter voluntary dissolution and are not under financial duress at that time are not counted as financially impaired. For the purposes of the performance statistics, A.M. Best considers impairments and defaults to be synonymous.

2. Construction of Default Rates of Insurance Carriers (FSR). This table was constructed by directly observing the default rates of insurance operating companies rated on the traditional Financial Strength Rating (FSR) scale.

3. Rating a Measure of Relative Credit Risk. A.M. Best's credit ratings generally are intended to indicate the relative degree of credit risk of an obligor or debt instrument rather than reflect a measure of specific default probability.

4. Data Consistent With Submission to the Securities and Exchange Commission. The data used to calculate default rates in this table is consistent with the data used to calculate the 1-year, 3-year and 10-year default rates for insurers as required by the Securities and Exchange Commission (the Commission) in Exhibit 1 of Form NRSR. Unlike the single cohort method of analysis used in the submission to the Commission, however, the calculations in this table reflect the use of the average cohort approach in order to capture the effect of the various economic cycles experienced by insurance carriers since 1992 when the current 13-point FSR scale (A++ to D) was adopted by A.M. Best.

5. Data Does Not Necessarily Reflect Default Expectations. The data in this table does not necessarily reflect our default rate expectations. For example, the fact that we show no default rate for the 1-year "A++" category does not mean that we expect no defaults for this rating. It only means that we have not yet observed any historical defaults over a 1-year period for companies rated "A++".

6. Data Changes Periodically. The data in the table will change if A.M. Best: 1) adds more ratings cohorts over time in order to calculate default rates, 2) changes its criteria for recognizing insurance company defaults, and 3) changes the default count for other reasons such as confidential supervision of insurance carriers discovered by A.M. Best. In most cases, A.M. Best will revise the default rates annually by March 31.

2. Construction of Default Rates of Corporates. This table was not constructed by directly observing the default rates of corporate ratings on the 21-point Issuer Credit Rating (ICR) scale because default data associated with corporate ICRs is sparse. Rather, this table was constructed by a) converting each default rate associated with each Financial Strength Rating (FSR) to its equivalent operating company ICR based on the FSR/ICR translation table, and then, b) converting the operating company ICR to an equivalent corporate rating based on a notching algorithm set forth in the criteria, Insurance Holding Company and Debt Ratings, to reflect the legal separation of insurance holding companies from operating insurers as well as the normal subordination of insurance holding company creditors to operating company policyholders.

3. Ratings a Measure of Relative Credit Risk. A.M. Best's credit ratings generally are intended to indicate the relative degree of credit risk of an obligor or debt instrument rather than reflect a measure of specific default probability.

4. Data Does Not Necessarily Reflect Default Expectations. The data in this table does not necessarily reflect our default rate expectations. *Default Rates From Best's Idealized Default Matrix.*
1. **Asset-Backed Securities Default.** A.M. Best designates an asset-backed security as being in default if the issuer of the security failed to timely pay principal or interest due according to the terms of the security.

2. **Construction of Default Rates of Asset-Backed Securities.** This table was not constructed by directly observing the default rates of asset-backed securities. The default rates of the ratings in this category are equivalent to the default rates in Best's Idealized Default Matrix published in December 2007. This matrix reflects A.M. Best's long-term view of defaults of asset-backed securities and structured finance transactions. This view was formed by considering the defaults associated with operating insurance companies rated by A.M. Best, the notching process employed to derive the ratings associated with holding company debt obligations, and the need to make distinctions between rating categories.

3. **Ratings as Measure of Relative Credit Risk.** A.M. Best's credit ratings generally are intended to indicate the relative degree of credit risk of an obligor or debt instrument rather than reflect a measure of specific default probability.

4. **Data Changes Periodically.** The data in the table will change if A.M. Best modifies Best's Idealized Default Matrix. This matrix was published in December 2007 but may be revised based on more recent insurance company default data.

3. The Main Assumptions and Principles used to Construct the Procedures and Methodology used to Determine the Credit Rating as required by Paragraph (a)(1)(ii)(C) of Rule 17g-7

Assumptions and Macroeconomic Factors

Based on historical experience and A.M. Best's transition studies, ratings typically move no more than one to two notches when rating action occurs. However, market influences, including macroeconomic conditions, interest rate movements, inflationary levels, volatility of capital markets, pricing levels and regulatory changes, could result in larger scale movement in the ratings.

Economics

A.M. Best factors the economic and financial system conditions of a country into all of its ratings. A.M. Best defines country risk as the risk that country-specific factors could adversely affect an insurer's ability to meet its financial obligations, and separates the risks into three main categories: economic risk, political risk and financial system risk.

Economic risk is the likelihood that fundamental weaknesses in a country's economy will cause adverse developments for an insurer. A.M. Best's assessment of economic risk evaluates the state of the domestic economy, labor market conditions, inflation levels and volatility, as well as prospects for growth and stability. The level of economic risk in a country is determined to be: (1) very low; (2) low; (3) moderate; (4) high or (5) very high.

Political risk is the likelihood that governmental or bureaucratic inefficiencies, societal tensions, an inadequate legal system or international tensions will cause adverse developments for an insurer. Political risk comprises the stability of a government and society; the effectiveness of international diplomatic relationships; the reliability and integrity of the legal system and business infrastructure; the efficiency of the government bureaucracy; and the appropriateness and effectiveness of the government's economic policies. The level of political risk in a country is determined to be: (1) very low; (2) low; (3) moderate; (4) high or (5) very high.

The scores for each category of risk then are aggregated and the country is assigned to one of five Country Risk Tiers with the following broad definitions:

- CRT-1: Predictable and transparent political environment, legal system and business infrastructure; sophisticated financial system regulation with deep capital markets; mature insurance industry framework.

- CRT-2: Predictable and transparent political environment, legal system and business infrastructure; sufficient financial system regulation; mature insurance industry framework.

- CRT-3: Developing political environment, legal system and business infrastructure with developing capital markets; developing insurance regulatory structure.
* CRT-4: Relatively unpredictable and nontransparent political, legal and business environment with underdeveloped capital markets; partially to fully inadequate regulatory structure.

* CRT-5: Unpredictable and opaque political, legal and business environment with limited or nonexistent capital markets; low human development and social instability; nascent insurance industry.

In general, as country risk increases (measured by a higher assigned tier), the distribution of ratings migrates down the rating scale as the level of risk approaches CRT-5. While potential volatility already is contemplated in each Country Risk Tier, unanticipated negative changes to the economic, political and/or financial system conditions could lead to downward pressure on ratings in that country.

- II(d). Not an Investment Advisor or Consultant

11. An Explanation or Measure of the Potential Volatility of the Credit Rating as required by Paragraph (a)(1)(ii)(K) of Rule 17g-7

Factors - Change Rating:

Negative rating actions could occur if there is a material deterioration in risk-adjusted capitalization due to a significant decline in operating performance. Potential rating impact: Minor.

Potential large-scale catastrophe events or an excessive amount of goodwill from a large-scale acquisition could also put downward pressure on the ratings if capital levels are significantly affected. Potential rating impact: Minor.

NOTE: Only a rating committee can make a rating decision and the above referenced factors would be taken into consideration, along with all available relevant information in determining a rating action. However, the magnitude of a potential...
change in the rating that could reasonably occur as a result of the impact of the factors listed above are characterized by the following summary chart:

<table>
<thead>

12. The Information on the Content of the Information of the Credit Rating as required by Paragraph (a)(1)(ii)(L) of Rule 17g-7

(1) Rating History and Performance

- Financial Strength / Issuer Credit Rating History

(2) Expected Probability of Default and Expected Loss

The Commission states that it does not expect NRSROs to alter the meanings of their credit ratings or rating procedures and methodologies to conform to this disclosure requirement. Rather, the Commission expects NRSROs to provide "information" to the extent it is consistent with their procedures and methodologies for determining credit ratings, on the expected probability of default and expected loss in the event of default. According to the Commission, this information could consist of, for example, historical default and loss statistics, respectively, for the class or subclass of the credit rating.

A.M. Best's credit ratings generally are intended to indicate the relative degree of credit risk of an obligor or debt instrument rather than reflect a measure of a specific default probability or loss expectation. A.M. Best is providing the historical default statistics or derivatives of such default statistics to comply with Rule 17g-7(a)(ii)(L)(2). A.M. Best does not produce any loss statistics related to any classes of credit ratings so it has no information about expected loss given default. Furthermore, expected losses given default is not consistent with A.M. Best's procedures and methodologies for determining credit ratings.

*Rating Data from 1992 to 2015
1. Impairments as a Proxy for Defaults. A.M. Best designates an insurer as a Financially Impaired Company (PIC) as of the first public action taken by an insurance department or regulatory body, whereby the insurer's a) ability to conduct normal insurance operations is adversely affected, b) capital and surplus have been deemed inadequate to meet regulatory requirements, or c) general financial condition has triggered regulatory concern. The actions include supervision, rehabilitation, liquidation, receivership, conservatorship, cease-and-desist orders, suspension, license revocation and certain administrative orders. Companies that enter voluntary dissolution and are not under financial duress at that time are not counted as financially impaired. For the purposes of the performance statistics, A.M. Best considers impairments and defaults to be synonymous.

2. Construction of Default Rates of Insurance Carriers (FSR). This table was constructed by directly observing the default rates of insurance operating companies rated on the traditional Financial Strength Rating (FSR) scale.

3. Rating a Measure of Relative Credit Risk. A.M. Best's credit ratings generally are intended to indicate the relative degree of credit risk of an obligor or debt instrument rather than reflect a measure of specific default probability.

4. Data Consistent With Submission to the Securities and Exchange Commission. The data used to calculate default rates in this table is consistent with the data used to calculate the 1-year, 3-year and 10-year default rates for insurers as required by the Securities and Exchange Commission (the Commission) in Exhibit 1 of Form NRSR. Unlike the single cohort method of analysis used in the submission to the Commission, however, the calculations in this table reflect the use of the average cohort approach in order to capture the effect of the various economic cycles experienced by insurance carriers since 1992 when the current 13-point FSR scale (A++ to D) was adopted by A.M. Best.

5. Data Does Not Necessarily Reflect Default Expectations. The data in this table does not necessarily reflect our default rate expectations. For example, the fact that we show no default rate for the 1-year "A++" category does not mean that we expect no defaults for this rating. It only means that we have not yet observed any historical defaults over a 1-year period for companies rated "A++".

6. Data Changes Periodically. The data in the table will change if A.M. Best: 1) adds more ratings cohorts over time in order to calculate default rates, 2) changes its criteria for recognizing insurance company defaults, and 3) changes the default count for other reasons such as confidential supervision of insurance carriers discovered by A.M. Best. In most cases, A.M. Best will revise the default rates annually by March 31.

2. Construction of Default Rates of Corporates. This table was not constructed by directly observing the default rates of corporate ratings on the 21-point issuer Credit Rating (ICR) scale because default data associated with corporate ICRs is sparse. Rather, this table was constructed by a) converting each default rate associated with each Financial Strength Rating (FSR) to its equivalent operating company ICR based on the FSR/ICR translation table, and then, b) converting the operating company ICR to an equivalent corporate rating based on a notch algorithm set forth in the criteria, Insurance Holding Company and Debts Ratings, to reflect the legal separation of insurance holding companies from operating insurers as well as the normal subordination of insurance holding company creditors to operating company policyholders.

3. Ratings a Measure of Relative Credit Risk. A.M. Best's credit ratings generally are intended to indicate the relative degree of credit risk of an obligor or debt instrument rather than reflect a measure of specific default probability.

4. Data Does Not Necessarily Reflect Default Expectations. The data in this table does not necessarily reflect our default rate expectations. For example, the fact that we show no default rate for the 1-year "aa+" category does not mean that we expect no defaults for this rating. It only means that we have not yet observed any historical defaults over a 1-year period for corporate obligations with an equivalent "aa+" rating.

5. Data Changes Periodically. The data in the table will change if A.M. Best: 1) adds more ratings cohorts over time in order to calculate default rates, 2) changes its criteria for recognizing insurance company defaults, and 3) changes the default count for other reasons such as confidential supervision of insurance carriers discovered by A.M. Best. In most cases, A.M. Best will revise the default rates annually by March 31.

1. Asset-Backed Securities Default. AMB Best designates an asset-backed security as being in default if the issuer of the security fails to timely pay principal or interest due according to the terms of the security.

2. Construction of Default Rates of Asset-Backed Securities. This table was not constructed by directly observing the default rates of asset-backed securities. The default rates in this category are equivalent to the default rates in Best’s Idealized Default Matrix published in December 2007. This matrix reflects AMB Best’s long-term view of defaults of asset-backed securities and structured finance transactions. This view was formed by considering the defaults associated with operating insurance companies rated by AMB Best, the notching process employed to derive the ratings associated with holding company debt obligations, and the need to make distinctions between rating categories.

3. Ratings as a Measure of Relative Credit Risk. AMB Best’s credit ratings generally are intended to indicate the relative degree of credit risk of and obligor or debt instrument rather than reflect a measure of specific default probability.

4. Data Changes Periodically. The data in the table will change if AMB Best modifies Best’s Idealized Default Matrix. This matrix was published in December 2007 but may be revised based on more recent insurance company default data.

While this output can have a high degree of variability, Best believes these models are very useful tools which provides its users with the expertise, research and technical knowledge otherwise unavailable to them.
