CONSOLIDATED COMMISSION ON UTILITIES Guam Power Authority | Guam Waterworks Authority P.O. Box 2977 Hagatna, Guam 96932 | [671]649-3002 | guamccu.org

GWA RESOLUTION NO. 19-FY2023

RELATIVE TO APPROVAL OF THE ID/IQ WATERLINE REPLACEMENT DESIGN AND CM CONTRACT

WHEREAS, under 12 G.C.A. § 14105, the Consolidated Commission on Utilities ("CCU") has plenary authority over financial, contractual and policy matters relative to the Guam Waterworks Authority ("GWA"); and

WHEREAS, the Guam Waterworks Authority ("GWA") is a Guam Public Corporation established and existing under the laws of Guam; and

WHEREAS, the Water Resource Master Plan Update 2018 (WRMP) developed and included a list of potential waterline replacement projects under Volume 2 of the WRMP Table 8-9 Candidate Projects for Water Pipeline Rehabilitation and Replacement and Table 8-12 Candidate Project Budgetary Cost Estimates for Pipeline Rehabilitation and Replacement; and

WHEREAS, in accordance with the CCU-approved 5-year Improvement Program addressing the 2011 Court Order, upcoming EPA compliance requirements, and other regulatory requirements, GWA continues to make improvements to the water system by issuing projects that will reduce water loss, improve water supply, and create pressure zones by installing new or replacing existing waterlines; and

WHEREAS, GWA has advertised the Request for Proposals (RFP-03-ENG-2022) soliciting statement of qualifications from experienced and qualified engineering firms to provide design and construction management services for the Indefinite Delivery/Indefinite Quantity (ID/IQ) for Engineering Design and Construction Management Services for Waterline Replacement and Upgrades; and

 $\| \cdot \|$

WHEREAS, 23 interested parties registered for the RFP package, from which GWA received proposal submittals from 8 firms before the RFP submittal deadline; and

WHEREAS, the GWA Architect-Engineer Selection committee reviewed and evaluated the 8 proposals (See Exhibit A – Evaluation Score Summary) and generated a short list of the top 3 firms with a recommendation to award a contract to the firm Duenas, Camacho, and Associates (See Exhibit B – GM's Determination); and

WHEREAS, Duenas, Camacho, and Associates and GWA negotiated the fee proposal for the design and construction management services for the Indefinite Delivery/Indefinite Quantity (ID/IQ) for Engineering Design and Construction Management Services for Waterline Replacement and Upgrades to be provided in the total amount of Five Million Nine Hundred Seventy-Three Thousand Six Hundred Eighty-Two Dollars (\$5,973,682.00) (See Exhibit C – Scope of Work and Fees); and

WHEREAS, GWA management seeks approval of the negotiated fee proposal in the amount of Five Million Nine Hundred Seventy-Three Thousand Six Hundred Eighty-Two Dollars (\$5,973,682.00) and approval to award a portion of the negotiated fee proposal in the amount of One Million Five Hundred Thousand Dollars (\$1,500,000.00); and

WHEREAS, GWA shall issue Task Orders for development of a master list of replacement sites and design and construction management of sites, which GWA have identified for immediate replacement; and

WHEREAS, funding in the amount of One Million Five Hundred Thousand Dollars (\$1,500,000.00) will be from the USEPA grants; and

NOW BE IT THEREFORE RESOLVED, the Consolidated Commission on Utilities does hereby approve the following:

1. The recitals set forth above hereby constitute the findings of the CCU.

- 2. The CCU finds that the terms of the fee proposal submitted by Duenas, Camacho, and Associates are fair and reasonable.
- 3. The CCU hereby authorizes the management to accept the fee proposal in the amount of Five Million Nine Hundred Seventy-Three Thousand Six Hundred Eighty-Two Dollars (\$5,973,682.00) from Duenas, Camacho, and Associates, which is also incorporated into this Resolution in its entirety (Exhibit C).
- 4. The CCU hereby further authorizes the management of GWA to enter into an ID/IQ contract with Duenas, Camacho, and Associates, in the amount of One Million Five Hundred Thousand Dollars (\$1,500,000.00).
- 5. The CCU hereby further approves the total funding amount for this project in the amount of One Million Five Hundred Thousand Dollars (\$1,500,000.00).
- 6. The CCU hereby approves the use of funding source(s) from USEPA grants.

RESOLVED, that the Chairman certified and the Board Secretary attests to the adoption of this Resolution.

DULY AND REGULARLY ADOPTED, this 3rd day of April 2023.

Certified by:

JOSEPH T. DUENAS

Chairperson

Attested by:

PEDRO ROY MARTINEZ

Secretary

SECRETARY'S CERTIFICATE

I, Pedro Roy Martinez, Board Secretary of the Consolidated Commission on Utilities as evidenced by my signature above do hereby certify as follows:

The foregoing is a full, true and accurate copy of the resolution duly adopted at a regular meeting by the members of the Guam Consolidated Commission on Utilities, duly and legally held at a place properly noticed and advertised at which meeting a quorum was present and the members who were present voted as follows:

AYES:	5
NAYS:	Ø
ABSENT:	
ABSTAIN:	Ø

Indefinite Delivery Indefinite Quantity (ID/IQ) for Engineering Design and CM

Services for Waterline Replacement and Upgrades

Re:

Design Fee Proposal, revision 1

Hafa Adai Mr. Yeoh,

Dueñas, Camacho & Associates (DCA) is pleased to submit the following fee proposal for engineering services for the subject project. The fees were developed using the projects listed in the 2018 Masterplan table 8-12 and the attached scope of work provided by GWA and amended. A list of the specific project numbers taken from the masterplan is provided in the attached fee breakdown.

Plans, specifications, and cost estimates	\$ 3,428,339.78
Program Management	\$ 73,032.00
Survey services	\$ 478,378.00
Hydraulic modeling services	\$ 52,208.22
Geotechnical services	\$ 330,000.00
UXO services	\$ 90,000.00
Archaeological services	\$ 467,500.00
Environmental and biological services	\$ 154,224.00
Property and land acquisition services	\$ 50,000.00
GPR and line location services	\$ 100,000.00
Construction Management	\$ 750,000.00
Total	\$ 5,973,682.00

Items in bold are time and materials based estimates.

Based on discussions with GWA, it is GWA's intent to award this project as task orders. DCA requests an annual escalation increase of 3% on the personnel rates shown in the attached fee breakdown starting in 2024. DCA will provide our updated insurance policy as soon as it is received from our insurer.

Sincerely,

Kenneth M. Rekdahl, P.E.

Vice-President

Dueñas, Camacho & Associates, Inc. Attachment: Scope of Work, Fee Proposal

SCOPE OF WORK (12.16.2022)

Indefinite Delivery/Indefinite Quantity (ID/IQ) for Engineering Design and CM Services for Waterline Replacement and Upgrades

GWA Project No. W22-04-BND

This ID/IQ will focus on sites which require removal of old pipeline and installation of new appropriately sized waterline around the island. The consultant shall work with GWA to develop a master list and prioritize locations for waterline replacement. From the master list, GWA shall select sites for the A/E to proceed with complete design ready for construction bid.

Engineering services will include, but not be limited to the following:

- 1. PS&E: Plans, Specifications, and Cost Estimate Development. Develop design for waterline distribution improvements and replacement. The work shall include full plans, specifications, and cost estimates at the 30% (basis of design), 60%, 90%, and 100% phases.
- Engineering program management to include developing master list of line replacement sites which incorporates GWA's Master Plan, GWA Operation's input for areas of high breakage rates, and site field investigations by the ID/IQ A/E and GWA. Sites shall be prioritized based on area of coverage, breakage rates, cost, and other relevant factors.
- 3. Survey services
- 4. Ground penetrating radar services
- 5. Archaeological services
- 6. Environmental and biological services
- 7. Property and land acquisition services
- 8. Hydraulic modeling services
- 9. Coordinating and facilitating various task with local and federal agencies for grants, general agency review, and permitting.
- 10. IFB preparation and bidding services to include RFI bid responses, Addendum preparation, bid evaluation/recommendation, and all other task necessary to assist the bid process.
- 11. Provide construction management services
 - a. Site management
 - b. Conduct weekly meetings
 - c. Construction inspection
 - d. Quality assurance testing

- e. Submittal, RFI, shop drawing review
- f. Payment request review
- g. Change order review and recommendation

The consultant shall furnish, in accordance with the agreed upon schedule, a complete, practical, economical design, plans, specifications, and related corrections and changes which are best suited for the contemplated construction, and ensure all work is completed in accordance with this Agreement and with sound engineering principles and is signed and sealed by a licensed Professional Engineer. The consultant shall provide all calculations, data, charts, field date, and other information of any type whatsoever which support its designs or other work performed pursuant to this Agreement. Proposer may not assert as a basis for refusing to provide such information that it is proprietary. Consultant shall satisfy GWA with design decisions that are based on objective evaluation of the requirements of the facility owner and user, meet site-specific conditions, comply with Project construction cost budget, and minimize long-term operation and maintenance costs. The consultant is aware and agrees that GWA has the right to submit the Consultant's work product to independent design reviewers and will make the necessary revisions based on GWA and it's third party review (if any).

The contract will provide for the issuance of Task Orders (TO) requiring a variety of engineering and construction services as needed and determined by GWA. Each TO will be negotiated with the consultant. The contract as noted is an Indefinite Delivery Indefinite Quantity (ID/IQ) type contract and GWA does not guaranteed any number of TO to be issued. GWA also does not guarantee a minimum or maximum dollar value of TO's placed with the consultant.

Examples of the types of work under this RFP includes, but not limited to, general waterline replacement/upgrades, etc.

Task Order Scopes of Work for Design and Construction Management

- 1. Design Services to be provided by the Consultant:
 - a. Project Management: The consultant shall develop a work plan and schedule for the scope of work to be accomplished within the agreed performance time of the TO's. The schedule shall include reasonable time periods for any review by GWA or other government agency (such as EPA, GEPA, etc.). Projects shall require reoccurring meetings during the progress of the work. Design meetings to discuss the overall plan, requirements, constraints, expectations, outcomes, design

features, design progress, and other project specific elements for discussion between GWA and the consultant to coordinate work.

b. Design: GWA anticipates that a TO shall be issued to begin developing the Master List of sites which require abandonment and replacement of waterlines of various sizes. Sites shall be selected from the Master List for design. TO's shall be issued for design of the sites.

The consultant shall prepare a basis of design for each design (30% phase). As part of the design, the consultant shall collect and review, from GWA and other sources, data required to design facilities outlined in each TO. Site-visits will be required to completely comprehend the scope of work, the design needs, and the necessary data collection. The consultant shall identify any constraining factors that affect design and construction. The consultant shall coordinate and meet with GWA to review available "as-builts" of existing water and other utilities. The basis of design shall establish the design criteria, define preliminary routing of the proposed pipelines, location of control valves, pumping stations, identify right-of-way limits, list questions needing answers for the design, and list decision items. Once the basis of design has been accepted by GWA, the consultant shall move into the design phases.

Following approval of the basis of design, the consultant shall proceed with design for the complete scope of work as outlined in each TO and prepare all engineering and hydraulic calculations, perform all field work, prepare construction plans, specifications, and estimate the cost of construction at the 60%, 90% and 100% phases.

c. Geotechnical Studies: When required by TO, the consultant shall conduct explorations for geotechnical investigation to determine subsurface conditions, soil properties, and groundwater levels as required for excavation information, foundation parameters, and related engineering information or anticipated construction conditions. A geotechnical report shall be prepared and submitted to GWA to include maps, boring records, soil type, allowable soil bearing capacity, pipe backfill suitability of in-situ soils, presence of groundwater water encountered, and all other pertinent information required to complete the scope of work.

- d. Field Surveys: When required by TO, the consultant shall conduct surveying for the purposes of a topographic survey, right-of-way, and developing design and construction drawings for the proposed facilities as described in each TO scope of work. The survey must indicate easements, property lines, existing utilities, existing water meters, edges of pavement, driveways, existing buildings, structures, trees, and fences within the vicinity of the project.
- e. Additional Design Services: As may be necessary for specific work, other additional design services such as archeological review, environmental permitting, biological surveys, ground penetrating radar services, property acquisition and survey services, pressure logging and flow metering equipment procurement, and all other services as described in Section W.
- 2. Construction Management Services to be provided by the Consultant:
 - a. Pre-Construction: the following elements of construction activity are required during the pre-construction stage of construction management. The consultant shall perform these tasks when required in a TO.

From the time of issuance of the Notice to Proceed (NTP for pre-construction activities prior to the issuance of DPW building permit), all duties listed in this section, at a minimum, shall be part of the CM's daily duties within typical working hours.

- Conduct pre-construction conference. Agenda shall be developed by the consultant.
- Conduct weekly meetings.
- Review Contractor's submittal and construction schedule.
- Review Contractor's master submittal log.
- Review all submittals for conformance with plans and specifications.
 Submittals to include product and material data, shop drawings, outage plans, schedule updates, and RFIs'.
- Review Contractor's safety and traffic control plans.
- Review the Storm Water Pollution Prevention Plan.
- Ensure that Contractor has applied for all required permitting to being the project.

- Set up and maintain Construction Management Software: ProCore
- Construction: the following elements of construction activity are required during the construction stage of construction management. The consultant shall perform these tasks when required in a TO.

From the time of issuance of the NTP (after issuance of the DPW building permit), all duties listed in this section, at a minimum, shall be part of the CM and Inspectors daily duties within typical working hours.

- Monitor and inspect daily construction activities in compliance with the contract, plans and specifications, and applicable codes and regulations.
- Witness all quality control testing by the Contractor.
- Maintain Construction Management Software (ProCore). All submittals shall be submitted through the management software.
- Conduct quality assurance testing and surveying as required by the plans and specifications.
- Prepare correspondences as requested by GWA.
- Conduct Davis-Bacon interviews if the construction project is grant funded.
- Review progress payment requests for accuracy and proper reflection of actual work performed and make recommendations to GWA regarding appropriateness and approval.
- Review contractor submitted payroll records for each payment request according to contract requirements.
- Issue directives and corrective action notices dealing with quality of workmanship, non-compliance, safety, and performance.
- At GWA's request, prepare field orders to change specific scope of work requirements.
- Schedule and coordinate all inspection, surveys and material testing.
- Review updated contractor's progress schedule and recommend approval or rejection to GWA.
- Verify contractor's material supply list with regard to delivery timetable, progress schedule, and justification for payment.
- Analyze and participate in negotiating claims and contract change requests; recommend action deemed appropriate.

- Prepare for GWA approval, change orders to modify the terms of the contract (change in cost, performance time, or technical provisions).
 Make changes to the design as necessary.
- Provide daily construction reports which includes pictures of construction highlighting deficient work, safety violations, examples of acceptable work, and other critical items. Reports shall be in ProCore.
- Maintain a set of as-built drawings recording all installed facilities, deviations from the original plans, details of installation, encountered subsurface features and utilities, and critical dimensions. This set of As-Built drawings is to be separate from the Contractor's as-built drawing set. The purpose of this task is to ensure that the CM has their own set to check against the Contractor's set of drawings.
- Conduct weekly (or specified meeting interval) project meetings with the contractor and GWA to discuss work progress and any concerns relating to the construction.
- Witness field tests performed by the construction contractor or his representative for compliance with the contract drawings and specifications.
- Inspect construction, installation, and assemblage of work agreed to with GWA. Verify conformance to the contract provisions and check for acceptable workmanship. Report acceptable and unacceptable work to GWA.
- c. Post Construction: the following elements of construction activity are required during the post-construction stage of construction management. The consultant shall perform these tasks when required in a TO.
 - Lead pre-final inspection and prepare a list of incomplete work to be completed before substantial completion and final completion.
 - Determine the date of substantial completion according to the contract terms.
 - Lead final inspection and prepare a punch list of deficiencies to be completed before final acceptance and final payment.
 - Perform or observe all operational testing for proper operation, functionality, and performance. Accumulate all performance test data and submit to GWA.

- Verify final quantities installed and note differences from the estimated contract amount.
- Accumulate and provide to GWA all records, documents, submittals, log books, files, test results, etc.
- Review contract required warranties, O&M manuals, etc. and verify full compliance by the contractor.
- Provide a final review of construction contractor's as-built drawings and transmit the as-built drawings to GWA.
- Provide CM's as-built drawings and transmit to GWA.
